**OVERVIEW**

FS-12 is a passive footswitch with built-in speaker simulation and a headphone amp with volume control. The signal direction can be modified (**A to B**, or **A to C**) with a toggle switch. In the **A-B** mode the LED indicator is on, in the **A-C** mode it is off.

**Attention!** Use 1/4" mono jack cables for either of the channel inputs.

When used with SCS Pedal Board, FS-12 works in a true bypass mode unless connected to the left side of the board. Headphone amp function works best with the optimal impedance of 32 Ohm. Speaker simulation features two modes - a 2X12" cab and a 1x12" cab. Use the **CLEAN/LEAD** switch to select between clean/distortion signals.

**SAFETY MEASURES**

- Keep away from high humidity.
- After exposure to cold, keep the device at room temperature for at least 30 minutes before switching on.
- Avoid dropping, keep away from dirt and water.

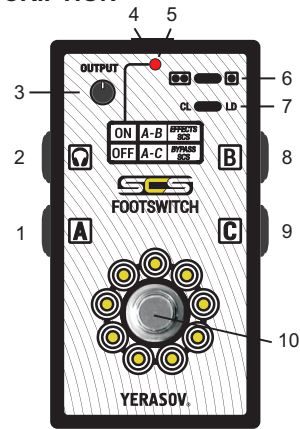

**APPLICATION**

The pedal is powered by either a 6F-22 battery or a 9V DC adapter. We recommend using YERASOV AD9-100 or AD9-500 adapters. For extended battery life unplug the guitar cable when device is not being used. When used with SCS Pedal Board power supply is not required.

**SCS PEDAL BOARD**

YERASOV FS-12 is compatible with SCS Pedal Board. The SCS connector is at the bottom of the pedal, the cable is included in the SCS Pedal Board package. For more information please visit [www.yerasov.ru](http://www.yerasov.ru)

**PANEL DESCRIPTION**

- 1 - Input A
- 2 - Headphone Jack
- 3 - **OUTPUT** - headphone volume control
- 4 - DC adapter input
- 5 - On/Off LED indicator
- 6 - Cabinet type selection
- 7 - **CLEAN / LEAD** toggle switch
- 8 - Input **B**
- 9 - Input **C**
- 10 - On / Off switch

**CONNECTION POLARITY OF DC ADAPTER**

**BATTERY REPLACEMENT**

Access the battery compartment by unscrewing the bottom cover. Always put the cover back after replacing the battery.

**SPECIFICATIONS**

Power supply(battery / DC), V.....	9
Current Draw, mA.....	10
With headphones connected, mA.....	30
Dimensions, mm.....	112 x 62 x 50
